This year marks the 21st Anniversary of the event and we are hoping that we can not only provide the materials, tools and lunch to the students, but also recognize them in an event program, and supply hard hats and goggles which their school budgets cannot provide for them. This event is not a fund raiser, but an educational "hands-on" opportunity to transition the students from classroom to the real work place.

The committee is enthusiastically working to make the event a success; but we need your help to make it happen.

The Build Competition, which promotes career awareness in the construction industry, includes student teams from four divisions: High School, Youth Build, Community College and Special Interest Group. Construction/Wood Shop student teams will construct a 6-ft. x 8-ft. structure. The Building Team will be challenged to build a structure at the competition site over a limited time period on Saturday, April 10 and Sunday, April 11, 2010. The "Build" teams will be judged by building industry professionals on such criteria as code compliance, effective use of materials, teamwork and safety.

There is also a design portion of the competition, in which individuals design and prepare construction documents as in the real world, according to defined building criteria and plan approval. Each submittal required a unique 6-ft. x 8-ft. structure design and/or a floor plan based on certain specifications. The students benefit as they learn first-hand about the construction process and are recognized at the awards ceremony held on Sunday.

The competition will be held on Saturday, April 10th from 7:00am to 6:00pm and Sunday, April 11th from 7:00am to 2:00pm at the Orange County Fair & Exposition Center. The Awards Program will be held from 2:00pm to 3:00pm.
